Social Value Statement

Purpose and Commitment:

At Westbourne Motors we believe that Social Value is a growing aspect of our business. We employ locally where possible and use local suppliers for our vehicles parts and consumables.

Carbon reduction is also a big aspect of what we are reviewing and looking at ways to combat this with a view to net zero in the future.

Targets:

Committing to reducing carbon emissions by 40% in the next 5 years across our sites where possible. Investigating options for solar paneling and renewable energy sources.

To improve and enrich staff knowledge and awareness with the completion of Equality, Diversity and Inclusion training, along with Health and Wellbeing training.

Volunteering and giving guidance and knowledge within community based initiates on how our operations work, looking to engage with, and encourage local employment from such events.

Visiting schools and colleges to give guidance and knowledge on our industry and the opportunities within it, attending such careers events to promote what we do locally.
